

Leak Inspection Material Series
TASETO MORAYMILLE
 (Liquid leak testing agent)

TASETO MORAYMILLE are inspection agents for oil or water leak detection used in petrochemical plants, tanks, boiler, piping systems, lubrication oil systems, transformer etc..

●Products

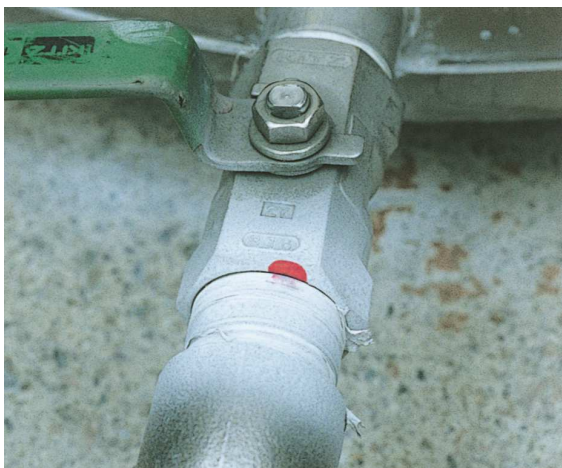

For Water: MORAYMILLE W

For Oil: MORAYMILLE Oil-Q

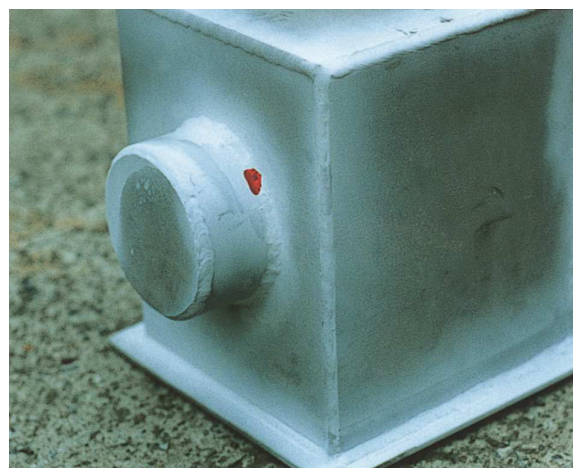

●Method of Use

1. Clean the inspection surface before applying TASETO MORAYMILLE.
2. Shake aerosol can well before use.
3. Spray uniformly with about 20cm away from surface.
4. When applied film dried, clear red indication can be found on white background if there is an oil or water leak.

MORAYMILLE W

MORAYMILLE Oil-Q

●Packing units

MORAYMILLE W (420ml Aerosol cans)

MORAYMILLE Oil-Q (420 ml Aerosol cans, 3-L or 16-L can)

Leak Inspection Material Series

TASETO LEAK CHECK

(Bubble solution for gas leak testing)

TASETO LEAK CHECK is gas leak testing agent for gas pipings, compressor and other air-tight container.

● **Products**

Standard type: LEAK CHECK

Viscous type: LEAK CHECK V

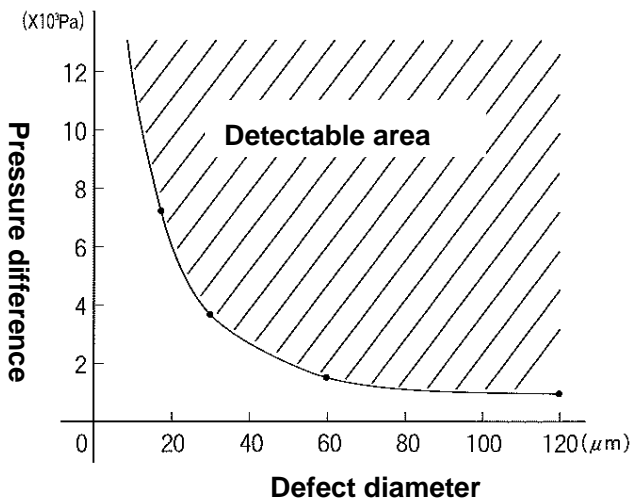

● **Method of Use**

1. Coat TASETO LEAK CHECK over suspect gas leaking areas.
2. Bubbles rise to the surface from minute gas leaks.

● **Features**

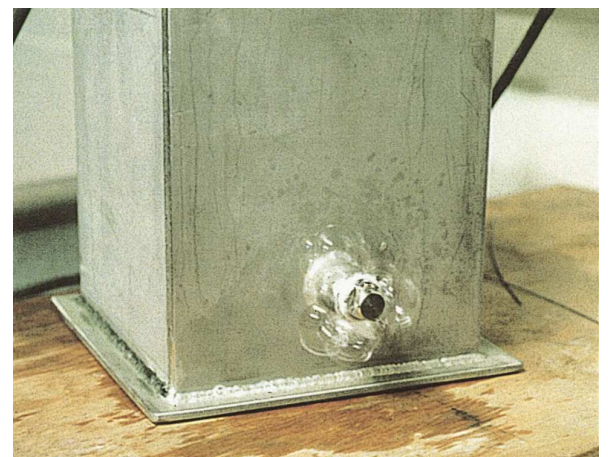

1. Easy to use, Very high detectability, meet the requirements of JIS Z 2329.
2. Suitable for leak testing of air, town gas, propane and freon gas.
3. Stable bubbling property.
4. Aerosol type uses safe, harmless carbon dioxide gas.

● **Relation of detection sensitivity and pressure difference**

● **Packing units**

420 ml Aerosol cans, 4-L or 18-L can
