

# Anti-Spatter Agents for Nozzle TASETO TIP CLEAN

“TASETO TIP CLEAN ” is anti-spatter agents for welding nozzle. It is very easy to use and have high cost performance.

## Usage

Anti-spatter agent for carbon dioxide welding nozzle

## Features

1. Prevent spatter deposition.
2. Increase significantly the life of torch nozzles tips.
3. Improve the efficiency of welding work.
4. Easy to coat, only by immersing the nozzle tip to Tip Clean.

## Method to use

1. Immerse the nozzle tip in TASETO TIP CLEAN while it is hot. If the nozzle tip is cold, warm it up by sacrifice welding about 10 cm and then immerse it in the jelly.
2. While the effect of TASETO TIP CLEAN is remained, the nozzle shines. When the nozzle tip loses its gloss, immerse it again in TASETO TIP CLEAN.

\* It may be more effective, when applied on from new nozzle / tip.

## Packing

300 g can × 12 cans

\* Please refer to “Safety Data Sheet (S.D.S.)” to get details of the products.
